

Introducing

T-Golf® - Golf's First Progressive Swing System and Only Transitional Product!

“T-Golf® will revolutionize the way people learn to play.”

Golf Digest

“With all the talk among golf industry pundits about making the game easier to attract new players, T-Golf® of San Clemente, CA is doing something about it.”

Golf Range Magazine

T-Golf® “Makes Golf More Accessible, fun & easier for everyone.”

T-Golf® can be used by golfers of any ability. It makes the ball easier to hit making golf enjoyable to learn. **T-Golf®** has universal appeal, disabled/beginners through tour players have seen vast improvement as the equipment supports all swing methodologies as we begin from a position of superior balance. **T-Golf®** is the only product that progressively assists the player to develop his or her golf swing. Golf instruction no longer needs to be a set of rigid lessons. It becomes easy and fun. **T-Golf®** has been tested and validated by many of the game's greatest teaching professionals. The **T-Golf®** method of instruction appeals to all potential golfers regardless of their age or physical ability. The result, golf is for everyone and truly, “The world is your golf course®”. The equipment may be used in multiple settings such as backyards, gyms, driving ranges and most importantly on the golf course. **T-Golf®** is affordable and has “created something in the way of value that didn't exist before.”

T-Golf® and Adaptive Golf

Decreased strength and impaired mobility are often the results of aging, illness and accidents. Golfers with these issues often believe that they can no longer enjoy the game. **T-Golf®** changes that for these golfers. It gives the golfer the option of several tee heights that will adapt to their individual needs. Even the need for a wheelchair does not prohibit the golfer from enjoying many aspects of the game. The **T-Golf®** system has been used by several rehabilitation hospitals as an effective component of the rehab process. The therapeutic benefit of golf leads to physical, mental, emotional, cognitive and social development for patients. Therapy sessions using **T-Golf®** can be done in any indoor or outdoor facility; all that is needed is a small area to utilize the equipment along with limited flight golf balls. The therapy and treatment becomes a positive experience for the patient. Since **T-Golf®** is fun and easy to use, patients are more likely to enjoy and participate in the activity. It is a winning situation for the patient, family, and therapist.
